Assurance Continuity Maintenance Report

BSI-DSZ-CC-0528-2008-MA-02

**TCOS Passport Version 2.02-EAC/
SLE66CLX800PE**

from

T-Systems Enterprise Services GmbH

Common Criteria Recognition
Arrangement
for components up to EAL4

The IT product identified in this report was assessed according to the *Assurance Continuity: CCRA Requirements*, version 1.0, February 2004 and the developers Impact Analysis Report (IAR). The baseline for this assessment was the Certification Report, the Security Target and the Evaluation Technical Report of the product certified by the Federal Office for Information Security (BSI) under BSI-DSZ-CC-0528-2008.

The change to the certified product is at the level of a minor editorial change in the Security Target, a change that has no effect on assurance. The identification of the maintained product is indicated by the same version number compared to the certified product.

Consideration of the nature of the change leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path to continuity of assurance.

Therefore, the assurance as outlined in the Certification Report BSI-DSZ-CC-0528-2008 is maintained for this version of the product. Details can be found on the following pages.

This report is an addendum to the Certification Report BSI-DSZ-CC-0528-2008.

Assessment

The IT product identified in this report was assessed according to the *Assurance Continuity: CCRA Requirements* [1] and the Impact Analysis Report (IAR) [2]. The baseline for this assessment was the Certification Report of the certified product (Target of Evaluation, TOE) [3], the Security Target [4] and the Evaluation Technical Report as outlined in [3].

The vendor for the TCOS Passport Version 2.0 Release 2-EAC/SLE66CLX800PE, T-Systems Enterprise Services GmbH, submitted an IAR [2] to the BSI for approval. The IAR is intended to satisfy the requirements outlined in the document *Assurance Continuity: CCRA Requirements* [1]. In accordance with those requirements, the IAR describes (i) the changes made to the certified TOE, (ii) the evidence updated as a result of the changes and (iii) the security impact of the changes.

The TCOS Passport Version 2.0 Release 2-EAC/SLE66CLX800PE was changed due to an editorial change in the Security Target [4] to clarify the different SHA hash algorithms included in the baseline certificate BSI-DSZ-CC-0528-2008 [3]. Since the change is not significant from the standpoint of security, the version number TCOS Passport Version 2.0 Release 2-EAC/SLE66CLX800PE remains unchanged.

Conclusion

The change to the TOE is at the level of a minor editorial change in the Security Target, a change that has no effect on assurance. The vendor for the TCOS Passport Version 2.0 Release 2-EAC/SLE66CLX800PE, T-Systems Enterprise Services GmbH, submitted an updated Security Target [4]. Consideration of the nature of the change leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path to continuity of assurance.

Therefore, BSI agrees that the assurance as outlined in the Certification Report [3] is maintained for this version of the product. This report is an addendum to the Certification Report [3].
