| Evaluation Facility | Japan Electronics & Information Technology Industries Association, Information Technology Security Center |
| Description of TOE | This TOE is a software module that is installed on the MFPs "KM-8030/KM-6030" of KYOCERA MITA Corporation, and which provides the ordinary functions, and also security functions for protecting residue data. This TOE is installed on the above-mentioned MFPs and protects image data remaining on the HDDs from unjust exposure, after various copying, printing, and network scanning processings, by providing an HDD overwriting function. And it has the administrator authentication function that identifies and authenticates a TOE machine administrator who sets the HDD overwrite deletion method and operates it. |
