

CCEVS APPROVED ASSURANCE CONTINUITY MAINTENANCE REPORT

ASSURANCE CONTINUITY MAINTENANCE REPORT FOR

ServerIron (JetCore family with IronWare OS version 11.0.00a and ADX family with IronWare OS version 12.0.00a)

Maintenance Report Number: CCEVS-VR-VID10077-2008a

Date of Activity: 28 September 2009

References: Common Criteria document CCIMB-2004-02-009 "Assurance Continuity: CCRA Requirements", version 1.0, February 2004;

"Brocade Communications Systems, Inc. Impact Analysis Report", version 0.2, dated 01 September 2009

Documentation Updated: Brocade Communications Systems, Inc. developer evidence documents.

Assurance Continuity Maintenance Report:

The vendor for the Foundry Networks IronShield (BigIron, NetIron, FastIron, and FastIron Edge) Switches and Routers, Brocade Communications Systems, Inc., submitted an Impact Analysis Report (IAR) to CCEVS for approval on 14 September 2009. The IAR is intended to satisfy requirements outlined in Common Criteria document CCIMB-2004-02-009, "Assurance Continuity: CCRA Requirements", version 1.0, February 2004. In accordance with those requirements, the IAR describes the changes made to the certified TOE, the evidence updated as a result of the changes, and the security impact of the changes.

Changes to TOE:

Product documentation upgrades were made in order to accommodate the rebranding of the product from Foundry Networks, Inc. to Brocade Communications, Inc. and to introduce the ServerIron (JetCore family with IronWare OS version 11.0.00a and ADX family with IronWare OS version 12.0.00a) product models into the TOE. The hardware changes in the new appliance models have no bearing on the security claims. Rather, the changes affect the number and speed of connections and form factor including the number of slots available in the supporting chassis.

Conclusion:

The non-security relevance of the changes leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path for assurance continuity. Therefore, CCEVS agrees that the original assurance is maintained for the above-cited version of the product.
