

CCEVS APPROVED ASSURANCE CONTINUITY MAINTENANCE REPORT

ASSURANCE CONTINUITY MAINTENANCE REPORT FOR

Interactive Link Data Diode Device, Gigabit Variant Version 3.2

Maintenance Report Number: CCEVS-VR-06-0051c

Date of Activity: 09/16/2009

References: Common Criteria document CCIMB-2004-02-009 "Assurance Continuity: CCRA Requirements", version 1.0, February 2004;

Impact Analysis Report, "Impact Analysis Report IAR-IL-DDD-004 for the Interactive Link, Data Diode Device," dated 24 April 2009

Documentation Updated: Interactive Link Data Diode Device, Gigabit Variant Installation and Administration Guide

Interactive Link Data Diode Device, Gigabit Variant developer evidence

Assurance Continuity Maintenance Report:

The vendor for the Interactive Link Data Diode Device, Gigabit Variant submitted an Impact Analysis Report (IAR) to CCEVS for approval on 12 June 2009. The IAR is intended to satisfy requirements outlined in Common Criteria document CCIMB-2004-02-009, "Assurance Continuity: CCRA Requirements", version 1.0, February 2004. In accordance with those requirements, the IAR describes the changes made to the certified TOE, the evidence updated as a result of the changes and the security impact of the changes.

Changes to TOE:

In January 2008, Tenix agreed to the sale of Tenix Defence to BAE Systems. The sale was completed in June 2008. The change in ownership of the company and its products require that they be re-branded. Therefore, relevant logos and references to company names on the product and related documentation have been updated to reflect BAE Systems.

Conclusion:

The changes to the TOE environment were analyzed and found to have no effect on the security of the evaluated TOE. The non-security relevance of the changes leads to the conclusion that the updates can be classified as a **minor change** and that certificate maintenance is the correct path to continuity of assurance.
