

## NIS/NCSC Endorsement Statement

1. As the foremost cybersecurity agency in charge of the Republic of Korea (ROK) government's IT security products procurement policy, the NIS accepts the collaborative Protection Profile(cPP) endorsed by the Common Criteria Recognition Arrangement(CCRA) Management Committee(MC) as procurement criteria of the ROK government agencies.

Title	collaborative Protection Profile for Hardcopy Devices v1.0e, dated 4 March 2024
-------	--

※ This endorsement statement applies only to version 1.0e of the HCD cPP and its Supporting Document(SD). Any future revisions of the cPP and SD will be endorsed following a separate review process.

2. The NIS recognizes the need for products that address the use cases identified in the HCD cPP and believes that assurance activities for the products will help improve the security of ROK government agencies and public institutions.
3. All Hardcopy devices successfully evaluated and certified against the cPP and SD in authorizing schemes of the CCRA, and in compliance with all NIS policies, will be included in the 'Validated Product List' available on the National Cyber Security Center website(<https://www.ncsc.go.kr:4018>).
