## NIAP CCEVS Endorsement Statement PP-Module for Stateful Traffic Filter Firewalls, Version 1.3, dated 27 September 2019

23 October 2019  
Version 1.0

STATEMENT: NIAP endorses the PP-Module for Stateful Traffic Filter Firewalls, Version 1.3, dated 27 September 2019. NIAP anticipates timely updates to this cPP-Module each time a new version of its Base-PP, the Network Device collaborative Protection Profile (NDcPP), is published.

With this endorsement, products claiming conformance to the PP-Configuration for Network Device and Stateful Traffic Filter Firewalls, Version 1.3, dated 27 September 2019 and in compliance with all NIAP policies, will be placed on the NIAP Product Compliant List: [https://www.niap-ccevs.org/CCEVS\\_Products/pcl.cfm](https://www.niap-ccevs.org/CCEVS_Products/pcl.cfm).

PURPOSE: The intent of this Endorsement Statement is to make it publicly known that NIAP CCEVS:

- recognizes a need for evaluated devices that are suitable for the use cases identified in the FW cPP-Module, to include distributed network devices;
- considers the Security Problem Definition and resulting Security Functional Requirements appropriate for the intended use cases; and,
- believes the FW cPP-Modules's companion Supporting Document (SD) specifies objective, repeatable Evaluation Activities that are appropriate for the intended environment, and will produce comparable results.

SCOPE: NIAP will revisit its endorsement during each release of the FW cPP-Module, SD, and PP-Configuration. If NIAP continues to endorse subsequent releases of the FW cPP-Module, an updated Endorsement Statement will be published.
