

Assurance Continuity Maintenance Report

BSI-PP-0026-2006-MA-01

Protection Profile

for a

Machine Readable Travel Document with „ICAO Application“, Extended Access Control, Version 1.2

developed on behalf of the

Federal Ministry of the Interior, Germany

Common Criteria Arrangement
for components up to EAL4

The Protection Profile identified in this report was assessed according to the *Assurance Continuity: CCRA Requirements*, version 1.0, February 2004 and the developers Impact Analysis Report (IAR). The baseline for this assessment was the Certification Report, the Protection Profile and the Evaluation Technical Report of the Protection Profile certified by the Federal Office for Information Security (BSI) under BSI-PP-0026-2006.

The changes to the certified Protection Profile are at the level clarifications, changes that have no effect on assurance. The identification of the maintained Protection Profile is indicated by a new version number compared to the certified product.

Consideration of the nature of the changes leads to the conclusion that they are classified as a minor changes and that certificate maintenance is the correct path to continuity of assurance.

Therefore, the assurance as outlined in the Certification Report BSI-PP-0026-2006 is maintained for this version of the Protection Profile. Details can be found on the following pages.

This report is an addendum to the Certification Report BSI-PP-0026-2006.

Bonn, 30th January 2008

Assessment

The Protection Profile identified in this report was assessed according to the *Assurance Continuity: CCRA Requirements* [1] and the Impact Analysis Report (IAR) [2]. The baseline for this assessment was the Certification Report of the certified Protection Profile [3], the Protection Profile [4] and the Evaluation Technical Report as outlined in [3].

The IAR for the Protection Profile for a Machine Readable Travel Document with „ICAO Application“ Extended Access Control, Version 1.2 is intended to satisfy the requirements outlined in the document *Assurance Continuity: CCRA Requirements* [1]. In accordance with those requirements, the IAR describes the changes made to the certified Protection Profile.

The Protection Profile was changed due to clarification of the definition of the TOE, clarification of the Life-cycle Phases and clarification of the security needs of the assets. The changes are not significant from the standpoint of security, however Configuration Management procedures required a change in the version number from Version 1.1 to Version 1.2.

Conclusion

The changes to the Protection Profile are at the level clarifications, changes that have no effect on assurance. Consideration of the nature of the changes leads to the conclusion that they are classified as a minor changes and that certificate maintenance is the correct path to continuity of assurance.

Therefore, BSI agrees that the assurance as outlined in the Certification Report [3] is maintained for this version of the Protection Profile. This report is an addendum to the Certification Report [3].
